## SUMMARY

An adaptive and highly motivated Computer Science graduate from Binus University who is passionate in software development. With a solid foundation in full-stack web development, mobile application development, and software engineering, I am well-equipped to contribute to the development of innovative software applications that meet the needs of businesses and consumers alike. I am eager to bring my skills and experience to a remote work environment. I am confident that my abilities and work ethic will make me a valuable addition to any team.

## EXPERIENCE

### Programmer
**Polytron Indonesia**                                **March 2022 - February 2023, Kudus, Central Java, Indonesia · On-site**

Develop and maintain full-stack applications that are integrated into a web-based information system for internal management. Projects include migration of several SAP-based applications to web-based applications, development of software license management applications, and development of project management applications.

### Mobile & Software Engineer
**NHS England**                                **September 2021 - December 2021, Remote**

- Plan for the development of a care home app and analyze its technical requirements
- Lead and manage other mobile & software engineers in developing the care home app
- Work with UI/UX designers in developing the screens of the care home app
- Develop frontend screens for the care home app using Flutter
- Collaborate with web developers to develop the web version of the application
